

JET-GUN LS-600N

High-Pressure Grease Gun — a compact body and numerous new mechanisms further improve working efficiency.

Features

- **New air-button mechanism** — makes trapped air easy to purge.
- **High pressure** — 4,500 psi as standard, and capable of up to 7,000 psi.
- **Capacity** — 400 g.
- **High efficiency** — 1 oz per 40 strokes.
- **Economical** — a low-wear special-steel piston that never leaks grease draws it out to the very last.
- **Safe** — locking mechanism (safety valve) for mounting cartridge grease.

Using the air button

1. Open the lever.
2. Press the air button 3–5 times to purge the air.
3. Resume work.
4. If grease does not come out, repeat steps 1 and 2 until it does.

Applications

Machine tools, construction machinery, automobiles, vehicles of all kinds, agricultural machinery, aircraft, ships and more.
