

JET-OFF N

Concrete dissolving and release agent.

Applications

- Removes concrete deposits from construction machinery, mixer trucks and all kinds of equipment, as well as from construction materials, scaffolding, window glass, tiled floors and other concrete-soiled surfaces.
- Dissolves and strips only the concrete, without damaging the equipment.

Composition

- Natural plant-derived distillates, natural organic acids, hydrochloric acid, phosphoric acid, fatty-acid surfactants, citric acid, and acidic ammonium fluoride.

How to use

- Spray on; then rinse with water, wipe off and dry.

Warning — handling precautions and first aid

1. This is a formulated chemical product. Ensure the work area is ventilated and avoid all contact with the body: always wear rubber gloves, goggles, boots, a mask, an apron and other protective equipment. (Contact with the eyes may cause inflammation; contact with the hands may cause rough skin.)
2. Do not mix with other cleaning agents or chemicals.
3. The product is strongly acidic: after stripping, rinse thoroughly with water.
4. If it contacts the body, wash thoroughly with water and soap.
5. If it gets into the eyes, flush with clean water until the irritation is gone.
6. If swallowed, induce vomiting and see a doctor immediately after first-aid treatment.
7. Contact with clothing and similar materials corrodes the fibres.
8. Store in a cool place out of the reach of children.
9. Note that some types of plating may discolour.
