SAVER P-200

Air-operated oil pump for drum cans.

Overview

A safe, light, compact and highly reliable air-operated oil pump that handles a wide range of oils from low to high viscosity. Ideal for factory use and for mounting on service cars. Built to order, so meters, hose lengths and other specifications can be configured to your needs.

Applications

Hydraulic oil, gear oil, engine oil and other lubricants of all kinds.

Features

- Light, easy-to-use compact design.
- Powerful delivery of 20 L per minute.
- The regulator and air gauge give instant control of air pressure, so the optimum pressure can be set for the oil's viscosity.
- The air filter removes dust and moisture from the air, preventing contamination of the lubricant.
- The lubricator saves maintenance work and extends the life of the pump body, for trouble-free daily operation.
- Optional oil gun with digital meter shows the dispensed volume at a glance.

Oil gun with digital meter — E-40 (option)

A new-type oil gun whose meter rotates to a position that is easy to read.
Connection: R 1/2" (male).
